

PARTITION WALL MADE OF A DOUBLE GYPSUM FIBERBOARD PANEL AND CANAFIBER INTERCAPEDINE HEMP FIBER PANELS

ITEM DESCRIPTION

Supply and installation of a partition wall made with two single Fermacell gypsum fiberboard panels, thickness 12.5 mm, on a wooden batten substructure fitted into horizontal galvanized sheet-metal "U" guides fixed to the floor and ceiling, with an insulating panel in between. The panels shall be staggered relative to one another and the joints between panels properly filled. Supply and installation of Canafiber Intercapedine hemp fiber insulating panels, thickness 8 cm (density 30 kg/m³, thermal conductivity 0.04 W/mK), inserted in the cavity between the panels.

Item inclusive of labor, materials and transport within a 130 km radius of Montichiari BS.

Gross measurement, openings not deducted (Vpp), up to 4.5 m². For larger openings, a surface area of 4.5 m² will be counted.

- Excluding skim coat.
- Excluding painting.
- Excluding layout markings and drawings
